

Innovative Solutions for Battery Powered Vehicles and Boats

KOP23

Power Battery Charger

MAIN FEATURES

- Very high efficiency up to 95 %
- Galvanic isolation of input and output
- Programmable for lithium batteries
- Fully automatic operation
- Compact design
- Simple to use and program
- High precision
- High and low power mode
- Single and three phase AC input
- Programmable maximum value of input current

TECHNICAL CHARACTERISTICS

■ Type	20000 W	7000 W
■ Min. output voltage	150 V	150 V
■ Max. output voltage	750 V	750 V
■ Maximum output current	67 A	30 A
■ Efficiency	Up to 95 %	Up to 95 %
■ Peak input current	32 A	32 A
■ Input voltage	3 x 400 V AC	230 V AC
■ Dimensions (L x W x H)	530 x 325 x 100 mm	
■ Weight	14.5 kg
